

Wondering about your future career?

Wish to make a difference? A career that is not just behind a desk?

Why not make Podiatry your next step?

Podiatry is a health profession that focuses on the diagnosis, treatment, prevention and management of diseases, defects and injuries of the foot, ankle and lower limb.

Do it for Us

Our feet are an area of the body that people frequently neglect. Podiatrists can change that. Lower limb care is particularly urgent as Singapore is facing an imminent crisis. With the rise in diabetic cases, more patients are requiring podiatric intervention to save limbs and lives.

Do it for Them

Podiatrists impact lives in many ways. Aside from providing care, podiatrists improve their patients' quality of life by educating and empowering them to make healthy choices and care for themselves.

Do it for You

As a career, podiatry offers diversity and flexibility. Podiatrists are challenged daily and work with a variety of people. Good communication and problem-solving skills are invaluable as each patient is unique. The profession is also ever changing as new developments in healthcare emerge daily, offering podiatrists constant opportunities to learn new skills and techniques.

A wide variety of career specialisations means that podiatrists are able to explore their clinical interests, allowing them to find the precise niche that best suits them.

There are 14 universities in the UK and Republic of Ireland offering a full time Bachelor of Science Honours degree in Podiatry / Podiatric Medicine in the UK. The course takes 3 or 4 years to complete depending on where you choose to study. To qualify & practice as a podiatrist you are required to pass all of the courses. This involves clinical work with patients, both in academic & placement environment.

PODIATRY IN PRACTICE

The huge variety of conditions that a podiatrist treats lends itself to a broad clinical experience in practice. The option to specialise & develop your practice in one area means you can focus your work should this be something you wish to embark on.

CAREER OPPORTUNITIES

The benefit of an honours degree in podiatry means you are able to work in both the NHS and Private setting. Having exposure to the vast array of clinical conditions affecting a person's feet can lead you in many different areas of practice. Options include sports podiatry, surgery, dermatology, paediatrics and now forensics along with staying in education and teaching settings. Being able to specialise but also maintain a broad clinical practice enables you to keep your options wide open.
